

BRUNO SALA

Full Stack Web Developer
LAMP, MEAN stacks
brunosala.com

Hello! My name is Daniel Bruno Sala, I'm a self-starting Full Stack Developer based out of Chicago, IL. I've worked with very diverse clients from various countries. My goal is to deliver high quality, bold products to my clients all while having a bit of fun.

I attribute my success as a developer to having strong algorithm development and documentation writing skills. Being able to pass on not only the solution but the "recipe" to the solution offers much more than just a deliverable.

CORE EXPERIENCE

Front End Angular Developer

International Legal Technology Association
October 2018 - April 2020

I lead the development on new websites and new mobile applications utilizing Angular 2+ as well as assisting in a large scale data migration into Salesforce.

- ❑ Utilized Angular 2+, Apache Cordova, and Force.js to build and deploy single page applications to browser, android, and iOS
- ❑ Assisted in the migration of 30+ years worth of customer data into Salesforce CRM
- ❑ Reviewed and documented solutions submitted for task and bug tickets in Jira

Full Stack LAMP Developer

The Creative Group - Robert Half
Jun 2016 - Oct 2018

I interviewed clients, bootstrapped web projects with specification and scope documents, set timelines, and defined budgets all before leading development.

- ❑ Interviewed clients and created project management documentation
- ❑ Built six marketing websites and two e-commerce platforms

Lead Full Stack LAMP Developer

E-Insure Services, Inc
Dec 2017 - April 2018

I lead the project team for einsurance.com bringing a severely outdated ASP.net platform into a Wordpress site and Laravel application system bringing page views, user retention, and internal efficiency up 400%, 22%, and 13% respectively.

- ❑ Hired my own freelancers
- ❑ Performed code review alongside testing my own submissions
- ❑ Optimized Windows 2016 IIS Server to handle both PHP based applications

Front End JavaScript Developer

All Digital Solutions
April 2017 - April 2018

I developed unique digital marketing solutions, websites, and automation utilities that were distributed to 50+ clients.

- ❑ Built a headless CMS solution that client users could input their own data and the HCMS would have available RESTful API points that digital signage could read from
- ❑ Created 2 hybrid mobile applications with native components that were used to authenticate users prior to the user entering a vendor-based utility

Freelance Full Stack LAMP, MEAN Developer

May 2014 - Present

I've been freelancing my entire career primarily working within the LAMP and MEAN stacks building websites, web applications, and hybrid mobile applications.
