- 455 Lectures

Google Cloud Conferences

- Attended conferences
- Received GCP certifications

Learn and Understand Node.js

- Express framework and MongoDB
- 230 Lectures

## Career Summary

Full Time	Contracts	Career Start Date
4	36	November 2014

### Full Time

**Lead Full Stack Engineer** Aug 2020 - Present  
*Allbound*

Contributor to new product features, legacy code management and upcycling, and project management.

- Interviewing and onboarding of new engineers
- Majority code review contributor
- Designed a front end framework project placing a majority of the legacy code base in a modern, scaleable toolchain
- Orchestrated aforementioned projects; scheduled meetings with stakeholders, designed workbooks, decision documents, and telephone logs

**Front End Angular Developer** Oct 2018 - April 2020  
*International Legal Technology Association*

Lead the development on new websites and new mobile applications utilizing Angular 2+ as well as assisting in a large scale data migration into Salesforce.

- Utilized Angular 2+, Apache Cordova, and Force.js to build and deploy single page applications to browser, Android, and iOS
- Set up automated testing for the Angular UIs using Karma
- Performed peer code review
- Assisted in the migration of 30+ years worth of customer data into Salesforce CRM
- Created automated tests to validate migration data
- Reviewed and documented solutions submitted for task and bug tickets in Jira

**Full Stack LAMP Developer** June 2016 - Oct 2018  
*The Creative Group*

Interviewed clients, created project management documentation, and led development on various client LAMP based projects.

- Enabled my clients by providing specification and scope documents, setting timelines, defining budgets and leading development
- Built four WordPress sites, two Laravel Applications, two e-commerce platforms
- Each individual client project lasted roughly three to six months

**Front End JavaScript Developer** April 2017 - April 2018  
*All Digital Solutions*

Developed unique digital marketing solutions, websites, and automation utilities that were distributed to 50+ clients.

- Built a headless CMS solution that client users could input their own data and the HCMS would have available RESTful API points that digital signage could read from
- Created two hybrid mobile applications using Angular with native components from Apache Cordova that were used to authenticate users prior to the user entering a vendor-based utility
- Assisted in developing an automated deployment system for WordPress sites that would automatically configure themselves based on a specification form

## Contracts
