BRUNO SALA

Full Stack Web Developer
LAMP, MEAN stacks
brunosala.com

Hello! My name is Daniel Bruno Sala, I'm a self-starting Full Stack Developer based out of Chicago, IL. I've worked with very diverse clients from various countries. My goal is to deliver high quality, bold products to my clients all while having a bit of fun.

I attribute my success as a developer to having strong algorithm development and documentation writing skills. Being able to pass on not only the solution but the "recipe" to the solution offers much more than just a deliverable.

CORE EXPERIENCE

Front End Angular Developer   Oct 2018 - April 2020
International Legal Technology Association

Lead the development on new websites and new mobile applications utilizing Angular 2+ as well as assisting in a large scale data migration into Salesforce.

- ❏ Utilized Angular 2+, Apache Cordova, and Force.js to build and deploy single page applications to browser, Android, and iOS
- ❏ Set up automated testing for the Angular UIs using Karma
- ❏ Performed peer code review
- ❏ Assisted in the migration of 30+ years worth of customer data into Salesforce CRM
- ❏ Created automated tests to validate migration data
- ❏ Reviewed and documented solutions submitted for task and bug tickets in Jira

Full Stack LAMP Developer   June 2016 - April 2017
The Creative Group - Robert Half   Feb 2018 - Oct 2018

Interviewed clients, created project management documentation, and lead development on various client LAMP based projects.

- ❏ Enabled my clients by providing specification and scope documents, setting timelines, defining budgets and leading development
- ❏ Built four WordPress sites, two Laravel Applications, two e-commerce platforms
- ❏ Each individual client project lasted roughly three to six months

Front End JavaScript Developer   April 2017 - April 2018
All Digital Solutions

Developed unique digital marketing solutions, websites, and automation utilities that were distributed to 50+ clients.

- ❏ Built a headless CMS solution that client users could input their own data and the HCMS would have available RESTful API points that digital signage could read from
- ❏ Created two hybrid mobile applications using Angular with native components from Apache Cordova that were used to authenticate users prior to the user entering a vendor-based utility
- ❏ Assisted in developing an automated deployment system for WordPress sites that would automatically configure themselves based on a specification form

Freelance Developer   May 2014 - Present

Developed websites, web applications, and mobiles applications for 34 contracts across the last six years. Pivotal moments in my freelance career are:

- ❏ thefutureofjewelry.com - A unique contract where I was fortunate enough to work with integrating a cutting edge 3D rendering-in-web technology called ShapeDriver which pushed the boundaries of in-browser capabilities
- ❏ einsurance.com - A six month contract where I lead a team of freelancers in migrating a 15+ year old ASP.net website and web application to a WordPress site and Laravel application. The resulting metrics included page views, user retention, and internal efficiency up 400%, 22%, and 13% respectively
