BRUNO SALA

Full Stack Software Engineer
PHP, Node.js oriented stacks
brunosala.com

Hello! My name is Daniel Bruno Sala, I'm a self-starting Full Stack Software Engineer based out of Chicago, IL. I've worked with a diverse array of clients from various countries on projects that range from simple website development to enterprise-scale application engineering. My goal is to deliver high quality, bold products to my clients all while having a bit of fun.

I attribute my success as a software engineer to having strong algorithm development and technical communication skills. Being able to pass on not only the solution but the "recipe" to the solution offers much more than just a deliverable.
